Wall mounted unit providing high efficiency and comfort

- Guaranteed heating capacity at low ambient temperature, down to -25°C
- Thanks to the unique free hanging coil of the outdoor unit, the defrost cycle is improved, resulting in lower running costs and no ice build-up
- Developed for regions with severe winter conditions
- The unit’s compact dimensions makes it ideal for renovation projects, especially for above door installation
- Seasonal efficiency values: full range A++ in cooling and heating
- Online controller (optional): control your indoor from any location with an app, via your local network or internet and keep an overview on your energy consumption
- Space saving contemporary wall mounted design
