Features

Enhanced comfort and energy savings

**COMFORT AIRFLOW**
The airflow direction is upward while in COOL operation, and downward while in HEAT operation. This function prevents cold or warm air from blowing directly on your body. [Page 13]

**ECONO**
This function enables efficient operation by limiting the maximum power consumption. It is useful when using the unit and other electrical devices simultaneously on a shared electrical circuit. [Page 14]

The English text is the original instruction. Other languages are translations of the original instructions.
Safety Precautions

Read the precautions in this manual carefully before operating the unit.

- Keep this manual where the operator can easily find it.
- Read the precautions in this manual carefully before operating the unit.
- This appliance is intended to be used by expert or trained users in shops, in light industry and on farms, or for commercial and household use by lay persons.
- Sound pressure level is less than 70 dB (A).
- The precautions described herein are classified as WARNING and CAUTION. They both contain important information regarding safety. Be sure to observe all precautions without fail.

<table>
<thead>
<tr>
<th>WARNING</th>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Failure to follow these instructions properly may result in personal injury or loss of life.</td>
<td>Failure to observe these instructions properly may result in property damage or personal injury, which may be serious depending on the circumstances.</td>
</tr>
</tbody>
</table>

- Never attempt.
- Be sure to follow the instructions.
- Be sure to establish an earth connection.

- After reading, keep this manual in a convenient place so that you can refer to it whenever necessary. If the equipment is transferred to a new user, be sure also to hand over the manual.

**WARNING**

- The appliance must be stored in a room without continuously operating ignition sources (for example: open flames, an operating gas appliance or an operating electric heater).
- In order to avoid fire, explosion or injury, do not operate the unit when harmful gases (e.g. flammable or corrosive) are detected near the unit.
- Be aware that prolonged, direct exposure to cool or warm air from the unit, or to air that is too cool or too warm can be harmful to your physical condition and health.
- Do not place objects, including rods, your fingers, etc., in the air inlet or outlet. Product damage or personal injury may result due to contact with the unit’s high-speed fan blades.
- Do not attempt to repair, dismantle, reinstall or modify the unit yourself as this may result in water leakage, electric shocks or fire hazards.
- Do not use flammable spray near the unit, or otherwise fire may result.
- Do not use refrigerant other than the one indicated on the outdoor unit (R32) when installing, moving or repairing. Using other refrigerants may cause trouble or damage to the unit, and personal injury.
- To avoid electric shocks, do not operate with wet hands.
- Do not wash the unit with water, as this may result in electric shocks or fire.
- Do not place water containers (vases etc.) above the unit, as this may result in electric shocks or fire hazards.
- Beware of fire in case of refrigerant leakage. If the unit is not operating correctly, i.e. not generating cool or warm air, refrigerant leakage could be the cause. Consult your dealer for assistance. The refrigerant within the unit is safe and normally does not leak. However, in the event of a leakage, contact with a naked burner, heater or cooker may result in generation of noxious gas. Do not longer use the unit until a qualified service person confirms that the leakage has been repaired.
- Do not attempt to install or repair the unit yourself. Improper workmanship may result in water leakage, electric shocks or fire hazards. Please contact your local dealer or qualified personnel for installation and maintenance work.
- When the unit is malfunctioning (giving off a burning odour, etc.) turn off power to the unit and contact your local dealer. Continued operation under such circumstances may result in a failure, electric shocks or fire hazards.
- Be sure to install an earth leakage breaker. Failure to install the earth leakage breaker may result in electric shocks or fire.
- Be sure to earth the unit. Do not earth the unit to a utility pipe, lightning conductor or telephone earth lead. Imperfect earthing may result in electric shocks.

**CAUTION**

- Do not use the unit for purposes other than those for which it is intended. Do not use the unit for cooling precision instruments, food, plants, animals or works of art as this may adversely affect the performance, quality and/or longevity of the object concerned.
Safety Precautions

- Do not expose plants or animals directly to airflow from the unit as this may cause adverse effects.
- Do not place appliances that produce naked flames in places exposed to the airflow from the unit as this may impair combustion of the burner.
- Do not block air inlets nor outlets. Impaired airflow may result in insufficient performance or trouble.
- Do not sit on the outdoor unit, put things on the unit, or pull the unit. Doing so may cause accidents, such as falling or toppling down, thus resulting in injury, product malfunctioning, or product damage.
- Do not place objects that are susceptible to moisture directly beneath the indoor or outdoor units. Under certain conditions, condensation on the main unit or refrigerant pipes, air filter dirt or drain blockage may cause dripping, resulting in fouling or failure of the object concerned.
- After prolonged use, check the unit stand and its mounts for damage. If they are left in a damaged condition, the unit may fall and cause injury.
- To avoid injury, do not touch the air inlet or aluminium fins of the indoor or outdoor units.
- The appliance is not intended for use by unattended young children or infirm persons. Impairment of bodily functions and harm to health may result.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children shall not play with the appliance.
- Cleaning and user maintenance shall not be made by children without supervision.
- Avoid impacts to the indoor and outdoor units, or otherwise product damage may result.
- Do not place flammable items, such as spray cans, within 1m of the air outlet. The spray cans may explode as a result of hot air from the indoor or outdoor units.
- Be careful not to let pets urinate on the unit. Urination on the unit may result in electric shocks or fire.
- Do not wash the unit with water, as this may result in electric shocks or fire.
- Do not place water containers (vases etc.) above the unit, as this may result in electric shocks or fire hazards.
- To avoid oxygen depletion, ensure that the room is adequately ventilated if equipment such as a burner is used together with the unit.
- Before cleaning, be sure to stop unit operation, turn off the circuit breaker or remove the power cord. Otherwise, an electric shock and injury may result.
- Only connect the unit to the specified power supply circuit. Power supplies other than the one specified may result in electric shocks, overheating and fires.
- Arrange the drain hose to ensure smooth drainage. Imperfect drainage may cause wetting of the building, furniture etc.
- Do not place objects in direct proximity of the outdoor unit and do not let leaves and other debris accumulate around the unit. Leaves are a hotbed for small animals which can enter the unit. Once in the unit, such animals can cause malfunctions, smoke or fire when making contact with electrical parts.
- Do not place objects around the indoor unit. Doing so may have an adverse influence on the performance, product quality, and life of the unit.
- Keep out of children's reach to ensure that they do not play with the appliance.

Installation site.

- To install the unit in the following types of environments, consult the dealer.
  - Places with an oily environment or where steam or soot occurs.
  - Salty environment such as coastal areas.
  - Places where sulfide gas occurs such as hot springs.
  - Places where snow may block the outdoor unit.

- Be sure to follow the instructions below.
  - The indoor unit is at least 1m away from any television or radio set (unit may cause interference with the picture or sound).
  - The drain from the outdoor unit must be discharged to a place of good drainage.

Consider nuisance to your neighbours from noises.

- For installation, choose a place as described below.
  - A place solid enough to bear the weight of the unit which does not amplify the operation noise or vibration.
  - A place from where the air discharged from the outdoor unit or the operation noise will not annoy your neighbours.

Electrical work.

- For power supply, be sure to use a separate power circuit dedicated to the unit.

System relocation.

- Relocating the unit requires specialized knowledge and skills. Please consult the dealer if relocation is necessary for moving or remodeling.
Names of Parts

Indoor Unit

Front panel

Air inlet

Air outlet

Flap (horizontal blade)  
Page 12

Louver (vertical blades)

• The louvers are inside of the air outlet.  Page 12

Indoor temperature sensor

• Detects the air temperature around the unit.

Display

Signal receiver

• Receives signals from the remote controller.
• When the unit receives a signal, you will hear a beep sound.

<table>
<thead>
<tr>
<th>Case</th>
<th>Sound type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operation start</td>
<td>beep-beep</td>

</table>

OPERATION lamp (green)

TIMER lamp (orange)  
Page 15,16

Indoor unit ON/OFF switch

• Press this switch once to start operation.
Press once again to stop it.
• For the operation mode setting, refer to the following table.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Temperature setting</th>
<th>Airflow rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO</td>
<td>25°C</td>
<td>AUTO</td>
</tr>
</tbody>
</table>

• This switch can be used when the remote controller is missing.
Names of Parts

- Open the front panel

Outdoor Unit

- The appearance of the outdoor unit may differ between different models.
Names of Parts

Remote Controller

Display (LCD)
- Displays the current settings. (In this illustration, each section is shown with its displays on for the purpose of explanation.)

AUTO button
- Automatically selects an appropriate operation mode (COOL or HEAT) based on the indoor temperature and starts the operation. [Page 9]

Direct operation buttons
- Starts the COOL, DRY, HEAT or FAN ONLY operation. [Page 9]

TEMPERATURE adjustment button
- Changes the temperature setting. [Page 10]

COMFORT button
- COMFORT AIRFLOW operation. [Page 13]

POWERFUL button
- POWERFUL operation. [Page 13]

OFF TIMER button (NIGHT SET mode) [Page 16]

ON TIMER button [Page 15]

Signal transmitter
- Receiver
- To use the remote controller, aim the transmitter at the indoor unit. If there is anything blocking the signals between the unit and the remote controller, such as a curtain, the unit may not operate.
- The maximum transmission distance is about 7m.

OFF button
- Stops the operation. [Page 10]

FAN setting button
- Selects the airflow rate setting. [Page 11]

ECONO button
- ECONO operation. [Page 14]

SWING button
- Adjusts the airflow direction. [Page 12]

TIMER CANCEL button
- Cancels the timer setting. [Page 15, 16]
Preparation Before Operation

To insert the batteries

1. Remove the back cover by sliding and then slightly lifting it.
2. Insert 2 dry batteries AAA.LR03 (alkaline).
3. Replace the back cover.

To fix the remote controller holder to a wall

1. Choose a place where the signals reach the unit.
2. Attach the holder to a wall, or similar location with the screws supplied with the holder.
3. Hang the remote controller on the remote controller holder.

Fahrenheit/Celsius display switch

Press \(\text{TEMP}^\circ\text{F}\) and \(\text{ON}\) (TIMER button) simultaneously for about 5 seconds.

- The temperature will be displayed in Celsius when it is presently displayed in Fahrenheit, and vice versa.
- The switch operation is only possible when the temperature is being displayed.

Turn on the circuit breaker

- After the power is turned on, the flap of the indoor unit opens and closes once to set the reference position.

NOTE

Notes on batteries
- When replacing the batteries, use batteries of the same type, and replace both old batteries together.
- The batteries will last for about 1 year. If the remote controller display begins to fade and the possible transmission range becomes shorter within a year, however, replace both batteries with new, size AAA.LR03 (alkaline).
- The batteries supplied with the remote controller are for initial operation. The batteries may run out in less than 1 year.

Note on remote controller
- Do not drop the remote controller. Do not get it wet.
The unit operates with the operation mode of your choice.

To start operation

**AUTO operation**
- To automatically select an appropriate temperature and operation mode.
  - Press **AUTO**.

**COOL operation**
- To lower the temperature.
  - Press **COOL**.

**DRY operation**
- To lower the humidity.
  - Press **DRY**.

**HEAT operation**
- To raise the temperature.
  - Press **HEAT**.

**FAN ONLY operation**
- To circulate air in the room.
  - Press **FAN ONLY**.
  - The OPERATION lamp lights green.

---

**NOTE**

**Notes on AUTO operation**
- In AUTO operation, the system selects an appropriate operation mode (COOL or HEAT) based on the indoor temperature and starts the operation.
- The system automatically reselects setting at a regular interval to bring the indoor temperature to the user-setting level.

**Note on DRY operation**
- Eliminates humidity while maintaining the indoor temperature as much as possible. It automatically controls temperature and airflow rate, so manual adjustment of these functions is unavailable.
AUTO · COOL · DRY · HEAT · FAN ONLY

Operation

To stop operation

Press **OFF**

- The OPERATION lamp goes off.

To change the temperature setting

Press **TEMP**

- Press ▲ to raise the temperature and press ▼ to lower the temperature.

<table>
<thead>
<tr>
<th>COOL operation</th>
<th>HEAT operation</th>
<th>AUTO operation</th>
<th>DRY or FAN ONLY operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>18 – 32°C</td>
<td>10 – 30°C</td>
<td>18 – 30°C</td>
<td>The temperature setting cannot be changed.</td>
</tr>
</tbody>
</table>

Tips for saving energy

Keeping the temperature setting at a moderate level helps save energy.
- Recommended temperature setting
  - For cooling: 26 – 28°C
  - For heating: 20 – 24°C

Cover windows with a blind or a curtain.
- Blocking sunlight and air from outdoors increases the cooling (heating) effect.

Keep the air filters clean.
- Clogged air filters cause inefficient operation and waste energy. Clean them once every 2 weeks. [Page 18]

If you are not going to use the unit for a long period, for example in spring or autumn, turn off the circuit breaker.
- The unit always consumes a small amount of electricity even while it is not operating.
Adjusting the Airflow Rate

You can adjust the airflow rate to increase your comfort.

To adjust the airflow rate setting

Press \( \text{FAN} \).

- Each pressing of \( \text{FAN} \) changes the airflow rate setting in sequence.

- When the airflow is set to "\( \text{\circ} \)", quiet operation starts and noise from the indoor unit will become quieter.

- In the quiet operation mode, the airflow rate is set to a weak level.

<table>
<thead>
<tr>
<th>AUTO, COOL, HEAT and FAN ONLY operation</th>
<th>DRY operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>( \text{FAN} )</td>
<td>The airflow rate setting cannot be changed.</td>
</tr>
</tbody>
</table>

**NOTE**

- **Note on airflow rate setting**
  - At smaller airflow rates, the cooling (heating) effect is also smaller.

- **When the unit reach target temperature:**
  - Fan is not operation in COOL / AUTO operation mode
  - Fan is working "Middle low" in HEAT operation mode
Adjusting the Airflow Direction

You can adjust the airflow direction to increase your comfort.

⚠️ CAUTION

- Always use a remote controller to adjust the angles of the flap. Moving the flap forcibly by hand may cause a malfunction.
- Be careful when adjusting the louvers. Inside the air outlet, a fan is rotating at a high speed.

To start auto swing

Up and down airflow direction

Press ➔.

- “SWEP” is displayed on the LCD.
- The flap (horizontal blade) will begin to swing.

To set the flap at the desired position

- This function is effective while the flap is in auto swing mode.

Press ➔ when the flap reaches the desired position.

- “SWEP” disappears from the LCD.

To adjust the louvers at desired position

Hold the knobs and move the louvers (vertical blades).

There is a knob in 2 places.

NOTE

Notes on airflow direction setting

- The movable range of the flap varies according to the operation mode.
- The flap will stop at the upper position when the airflow rate is changed to low during the up and down swing setting.

Movable range of the flap
COMFORT AIRFLOW Operation

The air direction and flow rate are adjusted so that the air will not blow directly at people in the room.

To start COMFORT AIRFLOW operation

Press \(\text{COMFORT} \) .

- "\(\text{COMFORT}\)" is displayed on the LCD.

<table>
<thead>
<tr>
<th>Flap direction</th>
<th>COOL and DRY operation</th>
<th>HEAT operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goes up</td>
<td></td>
<td>Goes down</td>
</tr>
<tr>
<td>Airflow rate</td>
<td>AUTO</td>
<td></td>
</tr>
</tbody>
</table>

- Not available in FAN ONLY mode.

To cancel COMFORT AIRFLOW operation

Press \(\text{COMFORT} \) again.

- "\(\text{COMFORT}\)" disappears from the LCD.
- The flap will return to the memory position from before COMFORT AIRFLOW operation.

POWERFUL Operation

POWERFUL operation quickly maximizes the cooling (heating) effect in any operation mode. In this mode, the unit operates at maximum capacity.

To start POWERFUL operation

Press \(\text{POWERFUL} \) .

- "\(\text{POWERFUL}\)" is displayed on the LCD.
- POWERFUL operation ends in 20 minutes. Then the system automatically operates again with the previous settings which were used before POWERFUL operation.

To cancel POWERFUL operation

Press \(\text{POWERFUL} \) again.

- "\(\text{POWERFUL}\)" disappears from the LCD.
ECONO Operation

ECONO operation enables efficient operation by limiting the maximum power consumption. This function is useful to prevent the circuit breaker from tripping when the unit operates alongside other appliances on the same circuit.

To start ECONO operation

Press ![ECONO].

- "الطایع" is displayed on the LCD.
- Not available in FAN ONLY mode.

To cancel ECONO operation

Press ![ECONO] again.

- "الطایع" disappears from the LCD.

NOTE

Note on COMFORT AIRFLOW operation
• If the up and down airflow direction is selected, the COMFORT AIRFLOW operation will be cancelled.

Notes on POWERFUL operation
• Pressing ![OFF] causes the settings to be cancelled, and "طایع" disappears from the LCD.
• POWERFUL operation will not increase the capacity of the unit if the unit is already in operation with its maximum capacity demonstrated.
  - In COOL, HEAT and AUTO operation
    To maximize the cooling (heating) effect, the capacity of outdoor unit increases and the airflow rate becomes fixed at the maximum setting.
    The temperature setting cannot be changed.
  - In DRY operation
    The temperature setting is lowered by 2.5°C and the airflow rate is slightly increased.
  - In FAN ONLY operation
    The airflow rate is fixed at the maximum setting.

Notes on ECONO operation
• Pressing ![OFF] causes the settings to be cancelled, and "الطایع" disappears from the LCD.
• If the power consumption level is already low, switching to ECONO operation will not reduce the power consumption.

Some useful functions can be used together.

<table>
<thead>
<tr>
<th>Useful Functions</th>
<th>Available/Not available</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMFORT AIRFLOW + ECONO</td>
<td>Available</td>
</tr>
<tr>
<td>POWERFUL + COMFORT AIRFLOW</td>
<td>Not available*</td>
</tr>
<tr>
<td>POWERFUL + ECONO</td>
<td>Not available*</td>
</tr>
</tbody>
</table>

*Priority is given to the function of whichever button is pressed last.
Timer functions are useful for automatically switching the unit on or off at night or in the morning. You can also use the ON TIMER and OFF TIMER together.

To use ON TIMER operation

Press [ON].

- "[ON] [HR]" is displayed on the LCD.
- Each pressing of [ON] advances the time setting by 1 hour.
- The time can be set between 1 and 12 hours.
- The TIMER lamp lights orange.

To cancel ON TIMER operation

Press [CANCEL].

- "[ON] [HR]" disappears from the LCD.
- The TIMER lamp goes off.

NOTE

In the following cases, set the timer again.
- After the circuit breaker has turned off.
- After a power failure.
- After replacing the batteries in the remote controller.
ON/OFF TIMER Operation

To use OFF TIMER operation

Press \( \text{OFF} \).

\( \text{OFF} \) \( \text{Hr} \) \( \text{OFF} \) \( \text{Hr} \) " is displayed on the LCD.

- Each pressing of \( \text{OFF} \) advances the time setting by 1 hour.
- The timer can be set between 1 and 12 hours.
- The TIMER lamp lights orange.

To cancel OFF TIMER operation

Press \( \text{CANCEL} \).

- " \( \text{OFF} \) \( \text{Hr} \) " disappears from the LCD.
- The TIMER lamp goes off.

To combine ON TIMER and OFF TIMER operation

- A sample setting for combining the 2 timers is shown below.
- " \( \text{ON} \) " and " \( \text{OFF} \) " are displayed on the LCD.

[Example]

When setting while the unit is operating
- Stops the unit 1 hour later and starts it 7 hours after that.

When setting while the unit is stopped
- Starts the unit 2 hours later and stops it 3 hours after that.

NOTE

NIGHT SET mode
- When the OFF TIMER is set, the unit automatically adjusts the temperature setting (0.5°C up in COOL, 2.0°C down in HEAT) to prevent excessive cooling (heating) during sleeping hours.
Care and Cleaning

CAUTION

Before cleaning, be sure to stop the operation and turn off the circuit breaker.
Do not touch the aluminium fins of the indoor unit. If you touch those parts, this may cause an injury.

Quick reference

Cleaning parts

Front panel

• Wipe it with a soft damp cloth.
• Only neutral detergent may be used.

If dirty

Air filter

• Vacuum dust or wash the filter.

Once every 2 weeks

If dirty

Indoor unit, outdoor unit and remote controller

• Wipe them with a soft cloth.

Once every 6 months

Titanium apatite deodorizing filter (without frame)

• Vacuum dust or replace the filter.

[Cleaning] Once every 6 months

[Replacement] Once every 3 years

NOTE

For cleaning, do not use any of the following:
• Water hotter than 40°C
• Volatile liquid such as benzene, petrol and thinner
• Polishing compounds
• Rough materials such as a scrubbing brush
Care and Cleaning

**Air filter**

1. **Open the front panel.**
   - Hold the front panel by the sides and open it.

2. **Pull out the air filters.**
   - Push the filter tab at the center of each air filter a little upwards, then pull it down.

3. **Wash the air filters with water or clean them with vacuum cleaner.**
   - It is recommended to clean the air filters every 2 weeks.

   **If the dust does not come off easily**
   - Wash the air filters with neutral detergent thinned with lukewarm water, then dry them up in the shade.

4. **Reattach the filters.**

5. **Close the front panel slowly.**
   - Press the front panel at both sides and the center.
   - Make sure that the front panel is securely fixed.
Care and Cleaning

> Titanium apatite deodorizing filter

1. Open the front panel and pull out the air filters. ➤Page 18

2. Take off the titanium apatite deodorizing filters.
   • Remove the filters from the tabs.

3. Clean or replace the titanium apatite deodorizing filters.

   [Cleaning]
   3-1 Vacuum dust, and soak in lukewarm water or water for about 10 to 15 minutes if very dirty.

   3-2 After washing, shake off remaining water and let them dry in the shade.
   • Do not wring out the filter to remove water from it.

   [Replacement]
   Remove the filter from the tabs and prepare a new one.
   • Dispose of the old filter as non-flammable waste.

4. Insert the titanium apatite deodorizing filters as they were.
   • When attaching the filter, check that the filter is properly set in the tabs.

5. Reattach the filters. ➤Page 18

6. Close the front panel slowly. ➤Page 18

NOTE

• Operation with dirty filters:
  − cannot deodorize the air,
  − cannot clean the air,
  − results in poor heating or cooling,
  − may cause odor.
• Dispose of old filters as non-flammable waste.
• To order a titanium apatite deodorizing filter, contact the dealer where you bought the unit.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
Care and Cleaning

Prior to a long period of non-use

1. Operate the FAN ONLY mode for several hours to dry out the inside.
   • Press FAN ONLY.

2. After operation stops, turn off the circuit breaker for the room unit.

3. Take out the batteries from the remote controller.

We recommend periodical maintenance

• In certain operating conditions, the inside of the unit may get foul after several seasons of use, resulting in poor performance. It is recommended to have periodical maintenance by a qualified contractor in addition to regular cleaning by the user.
• For qualified contractor maintenance, please contact the dealer where you bought the unit.

Winter season

The icicles needs to be removed. Use gloves to avoid injury and unit damage.

Important information regarding the refrigerant used

This product contains fluorinated greenhouse gases. Do not vent gases into the atmosphere.

Refrigerant type: R32
GWP (1) value: 675

(1) GWP = global warming potential

Periodical inspections for refrigerant leaks may be required depending on European or local legislation. Please contact your local dealer for more information.

NOTICE regarding tCO₂eq

In Europe, the greenhouse gas emissions of the total refrigerant charge in the system (expressed as tonnes CO₂-equivalent) is used to determine the maintenance intervals. Follow the applicable legislation.

Formula to calculate the greenhouse gas emissions:
GWP value of the refrigerant × Total refrigerant charge [in kg] / 1000
FAQ

• The following cases are not unit troubles but have some reasons. You may just continue using it.

Indoor unit

The flap does not start swinging immediately.

• The unit is adjusting the position of the flap. The flap will start moving soon.

The unit stops generating airflow during operation.

• Once the set temperature is reached, the airflow rate is reduced and operation stopped in order to avoid generating cool airflow (during heating) or in order to keep the humidity from rising (during cooling). Operation will resume automatically when the indoor temperature rises or falls.

HEAT operation stops suddenly and a flowing sound is heard.

• The outdoor unit is defrosting. HEAT operation starts after the frost on the outdoor unit has been removed. This can take about 4 to 12 minutes.

Operation does not start soon.

■ When or any direct operation button was pressed soon after operation was stopped.
• This is to protect the unit. You should wait for about 3 minutes.

Different sounds are heard.

■ A sound like flowing water
• This sound is generated because the refrigerant in the unit is flowing.
• This sound is generated when the water is flowing away from the unit during COOL or DRY operation.

■ Blowing sound
• This sound is generated when the flow of the refrigerant in the unit is switched over.

■ Ticking sound
• This sound is generated when the cabinet and frame of the unit slightly expand or shrink as a result of temperature changes.

■ Whistling sound
• This sound is generated when refrigerant flows during defrosting operation.

■ Clicking sound during operation or idle time
• This sound is generated when the refrigerant control valves or the electrical parts operate.

■ Clopping sound
• This sound is heard from the inside of the unit when the external device sucks the air out of the room (e.g. exhaust fan, extractor hood) while the doors and windows in the room are closed. Open the doors or window or turn off the device.

Outdoor unit

The outdoor unit emits water or steam.

■ In HEAT operation
• The frost on the outdoor unit melts into water or steam when the unit is in defrosting operation.

■ In COOL or DRY operation
• Moisture in the air condenses into water on the cool surface of the outdoor unit piping and drips.
# Troubleshooting

Before making an inquiry or a request for repair, please check the following. If the problem persists, consult your dealer.

## Not a problem

This case is not a problem.

## Check

Please check again before requesting repairs.

### The unit does not operate

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>OPERATION lamp is off.</strong></td>
<td>- Has the circuit breaker been tripped or the fuse blown?</td>
</tr>
<tr>
<td></td>
<td>- Is there a power failure?</td>
</tr>
<tr>
<td></td>
<td>- Are batteries set in the remote controller?</td>
</tr>
<tr>
<td><strong>OPERATION lamp is blinking.</strong></td>
<td>- Turn off the power with the circuit breaker and restart operation with the remote controller. If the OPERATION lamp is still blinking, check the error code and consult your dealer.</td>
</tr>
</tbody>
</table>

### The unit suddenly stops operating

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>OPERATION lamp is on.</strong></td>
<td>- To protect the system, the unit may stop operating after sudden large voltage fluctuations. It automatically resumes operation in about 3 minutes.</td>
</tr>
<tr>
<td><strong>OPERATION lamp is blinking.</strong></td>
<td>- Is there anything blocking the air inlet or air outlet of the indoor unit or outdoor unit? Stop operation and after turning off the circuit breaker, remove the obstruction. Then restart operation with the remote controller. If the OPERATION lamp is still blinking, check the error code and consult your dealer.</td>
</tr>
</tbody>
</table>

### The unit does not stop operating

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
</table>
| **The unit continues operating even after operation is stopped.** | - Immediately after the unit is stopped  
  - The outdoor unit fan continues rotating for about another 1 minute to protect the system.  
  - While the unit is not in operation  
  - When the outdoor temperature is high, the outdoor unit fan may start rotating to protect the system. |

### The room does not cool down / warm up

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
</table>
| **Air does not come out.**          | - In HEAT operation  
  - The unit is warming up. Wait for about 1 to 4 minutes.  
  - During defrosting operation, hot air does not flow out of the indoor unit. |
| **Air does not come out / Air comes out.** | - Is the airflow rate setting appropriate?  
  - Is the airflow rate setting low, such as “Indoor unit quiet” or “Airflow rate 1”? Increase the airflow rate setting.  
  - Is the set temperature appropriate?  
  - Is the adjustment of the airflow direction appropriate? |
| **Air comes out.**                  | - Is there any furniture directly under or beside the indoor unit?  
  - Is the unit in ECONO operation?  
  - Are the air filters dirty?  
  - Is there anything blocking the air inlet or air outlet of the indoor unit or outdoor unit?  
  - Is a window or door open?  
  - Is an exhaust fan turning? |
Troubleshooting

Mist comes out

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mist comes out of the indoor unit.</td>
<td>• This happens when the air in the room is cooled into mist by the cold airflow during COOL or other operation.</td>
</tr>
</tbody>
</table>

Remote controller

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The unit does not receive signals from the remote controller or has a limited operating range.</td>
<td>• The batteries may be exhausted. Replace both batteries with new dry batteries AAA.LR03 (alkaline). For details, refer to &quot;Preparation Before Operation&quot;. Page 3 • Signal communication may be disabled if an electronic-starter-type fluorescent lamp (such as inverter-type lamps) is in the room. Consult your dealer if that is the case. • The remote controller may not function correctly if the transmitter is exposed to direct sunlight.</td>
</tr>
<tr>
<td>LCD is faint, is not working, or the display is erratic.</td>
<td>• The batteries may be exhausted. Replace both batteries with new dry batteries AAA.LR03 (alkaline). For details, refer to &quot;Preparation Before Operation&quot;. Page 3</td>
</tr>
<tr>
<td>Other electric devices start operating.</td>
<td>• If the remote controller activates other electric devices, move them away or consult your dealer.</td>
</tr>
</tbody>
</table>

Air has an odor

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The unit gives off an odor.</td>
<td>• The room odor absorbed in the unit is discharged with the airflow. We recommend you to have the indoor unit cleaned. Please consult your dealer.</td>
</tr>
</tbody>
</table>

Others

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The unit suddenly starts behaving strangely during operation.</td>
<td>• The unit may malfunction due to lightning or radio. If the unit malfunctions, turn off the power with the circuit breaker and restart the operation with the remote controller.</td>
</tr>
</tbody>
</table>

Notes on the operating conditions

- If operation continues under any conditions other than those listed in the table,
  - A safety device may activate to stop the operation.
  - Dew may form on the indoor unit and drip from it when COOL or DRY operation is selected.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Operating conditions</th>
</tr>
</thead>
<tbody>
<tr>
<td>COOL / DRY</td>
<td>Outdoor temperature: -10~46°C</td>
</tr>
<tr>
<td>HEAT</td>
<td>Outdoor temperature: -25~24°C</td>
</tr>
</tbody>
</table>
Troubleshooting

- Call the service shop immediately

⚠️ WARNING
When an abnormality (such as a burning smell) occurs, stop operation and turn off the circuit breaker.
- Continued operation in an abnormal condition may result in troubles, electric shocks or fire.
- Consult the service shop where you bought the unit.

Do not attempt to repair or modify the unit by yourself.
- Incorrect work may result in electric shocks or fire.
- Consult the service shop where you bought the unit.

If one of the following symptoms takes place, call the service shop immediately.
- The power cord is abnormally hot or damaged.
- An abnormal sound is heard during operation.
- The safety breaker, a fuse, or the earth leakage breaker cuts off the operation frequently.
- A switch or a button often fails to work properly.
- There is a burning smell.
- Water leaks from the indoor unit.

- After a power failure
  - The unit automatically resumes operation in about 3 minutes. You should just wait for a while.

- Lightning
  - If lightning may strike the neighbouring area, stop operation and turn the breaker off for system protection.

- Disposal requirements

Your product and the batteries supplied with the controller are marked with this symbol. This symbol means that electrical and electronic products and batteries shall not be mixed with unsorted household waste.

For batteries, a chemical symbol can be printed beneath the symbol. This chemical symbol means that the battery contains a heavy metal above a certain concentration. Possible chemical symbols are:

- Pb: lead (>0.004%)

Do not try to dismantle the system yourself: the dismantling of the product, treatment of the refrigerant, of oil and of other parts must be done by a qualified installer in accordance with relevant local and national legislation.

Units and waste batteries must be treated at a specialized treatment facility for re-use, recycling and recovery. By ensuring correct disposal, you will help to prevent potential negative consequences for the environment and human health. Please contact the installer or local authority for more information. Dismantling of the unit, handling of the refrigerant, oil and other parts, should be done in accordance with the relevant local and national regulations.
Troubleshooting

- Fault diagnosis by remote controller
  - The remote controller can receive relevant error codes from the indoor unit.

1. When \( \text{CANCEL} \) is held down for about 5 seconds, “00” blinks in the temperature display section.

2. Press \( \text{CANCEL} \) repeatedly until a continuous beep is produced.
  - The code indication changes as shown below, and notifies you with a long beep.

**NOTE**

- A short beep indicates non-corresponding codes.
- To cancel the code display, hold \( \text{CANCEL} \) down for about 5 seconds. The code display also clears if no button is pressed for 1 minute.
